

Overlay decals are functional and decorative at the same time. The type of material can be just as important as the design. Polycarbonate materials are an excellent choice for any overlay project. It can be printed both first surface and subsurface and comes in a variety of finishes, including clear, velvet, suede, and polished. Polycarbonates offer excellent protection and can be easily cleaned. Other benefits include embossing properties, heat-resistant up to 275° F, and minimal shrinkage. Adding selective texture gives your overlay an unique finish, while selective adhesive leaves windows clear and buttons usable.

COLORS

Whether your brand color is unique or references a pantone color, your overlay is customize to fit your needs. Choose from chrome, metallic, opaque, or transparent inks to complete the design.

APPLICATION

Overlay decals are available with or without adhesive. Choosing the right adhesive to work with the desired end-use is a necessity. We have many options to ensure your overlay adheres to your product. Add a split or tab to the easy release-backing paper for an effortless application process.
